

(Single stage)

1.0 Era

FVe

11-75kW/15-100HP

Small but perfectly formed

- Single-stage, reliable, cost-effective
- In contrast to piston compressors, the FVe series is quieter, safer and more efficient
- The high-efficiency IE5 oil-cooled motor allows for 24/7 operation
- IP65 protection for enhanced safety and stability

Ideal for small business operation

ideal for 1,500-2,500 operating hours per year
pursuing minimized upfront machine cost

(DOUBLE STAGE)

- DDVe

2.0 Era DDVe 11-450kW/15-600HP

Elegantly engineered

- Best-in-class performance, highly reliable, and low energy consumption
- Long warranty period, better quality assurance
- Equipped with three modes of operations to adapt different needs, i.e. full loading mode, long-life mode, and optimal energy efficiency mode

Ideal for long-term business operation

ideal for > 2,500 operating hours per year
pursuing minimized life-cycle cost

- GGVE

Ideal for high-standard business
Pursuing maximized return of air compressor

3.0 Era **GGVe** 9-450kW/10-600HP

Tailored customization

- Customized air pressure, air flow, and air quality tailored to customer's specific air usage need
- Featured with larger capacity of two-stage air end, motor, and inverter
- More detection meters to effectively monitor and prevent any malfunctions
